Like the note said, I had them make it in white gold especially for you. I hope you really like it.

It's a scarab bracelet – the design on the onyx stones are scarabs, which were very big in ancient Egypt used for amulets. They are made in various colors but this one in was done entirely in black so it goes with anything.

I had this made for you a little while back. It was offered only in yellow gold, so I had to have it made in white gold to match most of your other jewelry. It has a special meaning to me, but that is of no consequence. If you don't like it, please consider giving it to one of your sisters or someone else who might like it.

Perfect  
for  
Allah

your wish granted!

Be you love someone?
