(GA; 2007-08-11)

Important! Criminal history record information is obtained one of two ways: 1) by conducting an inquiry using personal identifiers such as name and date of birth (name search), or 2) by submitting fingerprint cards to the Georgia Crime Information Center (GCIC). When conducting a name search for criminal history record information, there is a possibility that the information returned belongs to a different person with the same, or similar, identifiers. In this case, a positive match of the person whose criminal history record is sought requires submission of fingerprint cards to GCIC. When conducting a fingerprint search for criminal history record information, the information returned does, in fact, belong to the individual. In this case, conducting a name search using the individual's personal identifiers would be the same information. (GA; 2007-08-11)

When the information contained in a criminal history report causes an adverse employment or licensing decision the individual, business or agency making the decision must inform the applicant of all information pertinent to the decision. The disclosure must include information that a criminal history record check was conducted, the specific contents of the record and the effect the record had upon the decision. Failure to provide all such information to the person subject to the adverse decision is a misdemeanor offense under Georgia law. Additionally, any unauthorized dissemination of this record or information herein also violates Georgia law. The plea of nolo contendere may be considered a conviction for some purposes; however, except as otherwise provided by law, it shall not be used against the defendant in any other court as a conviction or admission of guilt or for the purpose of effecting any civil disqualification of the defendant to hold public office, to vote, to serve upon any jury, or any other civil disqualification imposed upon a person convicted of any offense under the laws of this state. (GA; 2007-08-11)

In the event that identifiers are not clearly associated to a specific cycle, the information is most likely non-fingerprint based information received from the Department of Corrections at the time of release from incarceration. (GA; 2007-08-11)
